SUMMARY

Computer Science student with a strong focus on back-end development. Hands-on experience with Python, Django, FastAPI, and database design. Passionate about building efficient, scalable back-end systems and proven leadership through heading the backend track at Google Developer Groups.

EXPERIENCE

Google Developer Group (GDG) – Benha National University

Oct. 2024 – Present

Head of Backend Team

Benha, Egypt

- Promoted to **Head of Backend Team in 2026**, overseeing backend curriculum and team direction
- Served as **Technical Member of the Backend Team in 2024–2025**, delivering hands-on technical sessions and supporting participants with backend concepts and implementation
- Led and mentored participants in the backend track, providing continuous guidance on backend development best practices
- **Facilitated a collaborative learning environment** ensuring comprehensive understanding of modern backend technologies across all team members
- Drove adoption of industry-standard tools and frameworks, improving overall code quality and development efficiency

Faisal Islamic Bank of Egypt

Aug. 2025 – Aug. 2025

Banking Operations Trainee

Egypt

- Completed a **one-month internship** (August 2025) gaining practical exposure to banking operations and financial processes

Credit Agricole Egypt

July 2025 – Aug. 2025

Banking Operations Trainee

Egypt

- Completed a **one-month training program** in banking operations and customer service

Freelance / Personal Projects

2023 – Present

Backend Developer

Remote

- Engineered robust server-side applications using **Django, FastAPI, and Python** with a strong focus on backend logic optimization and performance tuning
- Designed, implemented, and optimized **MySQL databases** for high performance, reliability, and scalability in large-scale application contexts
- Developed and integrated **RESTful APIs** with Django REST Framework and FastAPI to enable efficient and secure data exchange between client and server systems
- Containerized backend applications using **Docker** and applied OOP principles to produce modular, maintainable, and reusable code components
- Maintained version control and streamlined team collaboration using **Git and GitHub**

PROJECTS

Kalamna – AI Customer Support Platform (*Graduation Project*)

2025 – 2026

- Multi-tenant SaaS platform letting businesses embed an AI support chat widget built specifically for **Egyptian colloquial Arabic**, with a **RAG pipeline** over each business's own knowledge base and emotion/urgency detection on incoming messages
- Member of the backend team: contributed to **RESTful APIs** and the **PostgreSQL** data model (businesses, staff, chats, knowledge bases)

Cinema Tickets Reservation API

2024 – 2025

- Built a RESTful Cinema Reservation System using **Django REST Framework**, enabling users to browse movies, select showtimes, and reserve tickets through secure API endpoints
- Implemented **JWT authentication** for secure user registration and login; structured database models to manage movies, showtimes, reservations, and users

Event Booking Web API

2024 – 2025

- Developed a **Django REST Framework** API for an Event Booking System with role-based access; users can browse events, register, and make secure bookings
- Implemented JWT authentication and structured database models to manage events, bookings, and users efficiently

To-Do List Web App

2023 – 2024

- Built a full-stack To-Do List application using **Django** with user authentication, task CRUD operations, and role-based access control; deployed on **Heroku**
- Designed a structured database with Django Models to ensure data privacy and personalized task management for each user

Store Management System Database

2023 – 2024

- Designed a **MySQL relational database** to manage an online store's users, products, categories, shopping cart, orders, and reviews with a scalable e-commerce structure

Portfolio Website

2024

- Built a responsive personal portfolio using **HTML, CSS, and JavaScript**, deployed via GitHub Pages; showcases projects, skills, and technical background

EDUCATION

Benha National University

Aug. 2022 – May 2026

Bachelor of Science in Computer Science

Benha, Egypt

- **Coursework:** Data Structures & Algorithms, Database Systems, Operating Systems, Object-Oriented Programming, Software Engineering, Computer Networks
- **Expected Graduation:** 2026

CERTIFICATES

Introduction to Databases for Back-End Development – Meta

HCIA-Datacom – Huawei

Python Programming Basics – Information Technology Institute (ITI)

SKILLS

Languages : C++ (4+ years), Python (3+ years), JavaScript, Dart, PHP

Frameworks : Django (2+ years), Django REST Framework (2+ years), FastAPI (1+ year)

Databases : MySQL (2+ years), SQLite, PostgreSQL

Tools & Technologies : Git, GitHub, Docker, Redis, RESTful APIs, RAG, HTTP/HTTPS, HTML, CSS
